Better design - more productivity

The Nilfisk BR 1100S/1300S scrubber/dryer has the most scrub options of any machine in the class. To meet your cleaning needs, disc or cylindrical interchangeable scrub decks are available in 1000 or 1300 mm. With the cylindrical model, side brooms eliminate manual sweeping along racks and walls.

The squeegee system provides 100% water pick ups on tight turns, leaving the floors clean, dry and safe for traffic. The new innovative Ecoflex system keeps the consumption control, but it also guarantees the possibility to boost temporarily water, detergent and brush pressure for more aggressive cleaning tasks; green meets clean.

With the large scrub deck, Ecoflex, the 265 l solution tank and a working speed of 9 km/h, you get profitable use of your time.

PRODUCT FACTS

- Ecoflex™ prepared: green, flexible, nice and easy
- High productivity: 1 to 1,3 m scrubbing path, 265 liters capacity and 9 km/h working speed
- Tilt steering wheel and “OneTouch™” control panel offers good ergonomcy and ease of use
