The high dump ride-on sweeper for the daily industrial cleaning

Nilfisk SR 1301 is a big performance ride-on sweeper. It's ideal for outdoor and indoor sweeping applications, such as parking lots, pathways, railway stations, loading bays, warehouses, and industrial settings.

A dust flap allows the collection of large debris, without having to stop to pick it up manually. And a hydraulic dump system allows to unload the hopper with 130 litres of dirt at a height of 1.42 m.

The key distinctive features of this sweeper are robustness for increased durability, best sweeping and suction results. The design is highly focusing on ergonomics for easy and convenient use. For fast inspections and ordinary maintenance, dust filter and main brush can easily be replaced without using tools.

PRODUCT FACTS

- Theoretical productivity from 6300 m² to 7860 m² per hour with the optional left side broom
- Hydraulically operated to dump into bins up to 1.5 m high
- Powerful vacuum to control the dust with the panel or the optional pocket filter
- It has climbing rate up to 20%
- Available in battery and petrol versions
