Ride-on combination machine for scrubbing and wet sweeping

The ER 1300/1600 ride-on combination machines are the definition of innovative and optimized design. This manoeuvrable front steer is the widest cylindrical scrub deck in its class. This deck's dual counter-rotating cylindrical brushes are capable of sweeping and scrubbing in one single pass.

Two different cleaning systems available in all the engine versions allow you to customize the ER 1300/1600 to your facility's needs. Cleaning paths up to 157 cm are available on the machines. This coupled with efficiently packaged 380 litre solution tank delivers the capability of cleaning up to 13.900 m²/h.

With ER 1300/1600 on-board Ecoflex system, productivity and chemical savings are maximized.

The ER 1300/1600 design has set the standard in productivity, serviceability, safety and ease of use.

PRODUCT FACTS

- OneTouch™ control panel, Front Steering system & ClearView™ sight lines
- 380 ltr solution & recovery tanks, 42 ltr vacuumized hopper
- Tip out recovery tank opening with debris tray (std)
- MaxAccess™: Full access to the machine for service
- DustGuard™ and Ecoflex™ for maximum machine efficiency and productivity
- NoTool™ squeegee blades, side blades and brushes replacement and adjustment
